Description

The Long Range IMP (Irritant Multi Purpose) Practice round is designed for use during training operations to simulate deployment of 'live' CS where weather, climate or water immersion (up to 10m) is a factor. It can be fired at ranges up to 35 metres and will produce an immediate, large volume cloud of chalk particles up to 10 metres behind a barricade.

The round incorporates a frangible projectile filled with chalk and stainless steel powder, which reduces the risk of ricochet and over penetration.
