### OVERVIEW

## Brass Ammunition

Code: PT1584E

Projectile Weight: 745 grains

**12.7 x 99mm (0.50") Tracer**

### Description

The Primetake Omega Sniper Ammunition has been designed as a highly accurate long range round, intended for use in high quality rifle/scope combinations of bolt action and semi-automatic rifles. For use where accuracy is a primary requirement.

Primetake's Omega Sniper range is manufactured with the highest quality components to the tightest tolerances achievable. Each production lot undergoes meticulous load development to guarantee optimised accuracy, velocity and minimal velocity spread thus resulting in a range of sniper ammunition that enjoys unrivaled hit probability at extreme ranges. Performance is dependent on the quality and specification of the selected firearm and atmospheric conditions.

This cartridge has a monolithic tracer projectile that features a high BC design, matched to our 725gn ball round. The round is designed to provide a highly visible trace out to a minimum of 1460m.

Range Safety Template available on request.
