

Upon interception, the DB5's Kevlar cords will wrap around the Drone's rotor blades, disabling the drone's flying capability, whilst preserving the drone for forensic investigation.

- Fast Acting 12 Gauge Solution
- Simple to Deploy (80m Range)
- Shotgun Compatible
- Drone on Drone Combat Option
- Preserves Drone Body
- A Highly Effective Interceptor
- Tough Kevlar Corded Web

The DB5 is a specialist, custom made, projectile used by law enforcement, military, aviation, and probation agencies. The 12 gauge solution can also be fired from a single weapon in quick succession to rapidly counter drone swarms.

Upon deployment, the DB5 Kevlar web spans up to 1.5m (conditions dependent), with alloy weights designed to help maintain the web's full span.

With the projectile weighing in at just 50 grams, contact effects associated with any potential collateral hazards are greatly mitigated against.
