## Birdscaring Cartridges

# Birdscaring Cartridges

12G Cartridges are manufactured by Primetake Ltd under ISO9001 control. They consist of a standard 3" (76mm) 12g plastic cartridge case with various loads described below and a rolled closure.

The cartridges have been specifically designed for airfield bird control, fired through either a signal pistol sleeved to 12G or unchoked shotgun; the cartridge fires a sub-calibre projectile with varying delays from 1.3 to 4.0 seconds to give varying ranges. A loud report is given at the designated range or alternatively a continuous screech. Range distances vary from 40m to 90m dependant on angle of fire and weather conditions.
