Methods of Use

The 75mm Blank is used for saluting and ceremonial purposes. It emits smoke and a loud report and leaves no burning debris on the ground after firing.

Description

The Cartridge consists of an anodised aluminium brass coloured two piece case which houses a percussion primer in the base, used to ignite the black powder charge.

Performance/Safety

The Cartridge is designed to be fired through a Field Gun fitted with an adaptor. Range Safety Template available on request.

Primetake's internal testing/ proofing methodology and weapon specification available on request.

Articles should remain within the original sealed package and be stored within a temperature controlled environment of +5°C to +30°C; relative humidity should not exceed 70%. Storage outside of these conditions will not be warranted and may reduce the shelf life and lead to the articles not functioning as intended.

At Primetake we constantly review our products—all specifications are a guide and may vary so please check that the latest specification meets your requirements
